RE: DRAINAGE PLAN FOR LEAVITT RESERVOIR II (L-9/D8) ENGINEER'S STAMP DATED  
OCTOBER 1, 1991 RECEIVED OCTOBER 16, 1991

Dear Mr. Grochowski:

Based on the information provided on your October 16, 1991 submittal, listed  
are some concerns that will need to be addressed prior to final approval:

1. You indicate a 30" S.D. & 18 S.D. adjacent to the west property  
line. Where do they go from there?

If I can be of further assistance, please feel free to contact me at 768-2650.

Sincerely,

*Bernie J. Montoya*

Re: Conceptual Grading & Drainage Plans for Santa Barbara and Leavitt  
Reservoirs

Dear Gilbert:

Attached are two copies each of the Drainage Plans for the referenced  
reservoir sites for your review and approval. Also attached are copies of the  
drainage information sheets for each site, and the pre-design meeting notes  
for the Santa Barbara site. Since the booster stations and reservoirs for each  
of the projects are not on the same site, we have submitted drainage  
information sheets for each site. The EPC hearings for these sites will be  
scheduled following the approval of the Rank Two Plan. Please be aware that  
these drawings are not for construction purposes, but only to show the  
feasibility of the site for use by the City as a reservoir site and for EPC  
approval. Detailed design and construction is at least two to three years in  
the future.

Please feel free to contact Darryl Gregg or me if you have any questions  
or comments.

Sincerely,

*Michial M. Emery*

Re: Resubmittal of Conceptual Grading & Drainage Plans for Santa Barbara and Leavitt Reservoirs

Dear Gilbert:

Attached are two copies each of the Drainage Plans for the referenced reservoir sites for your review and approval. The attached plans replace the copies submitted under cover of our letter dated September 24, 1991, which did not have the requested engineers stamp. The plans in the first submittal were not stamped since the drawings are not for construction purposes, but only to show the feasibility of the site for use by the City as a reservoir site and for EPC approval. As noted in our previous letter, detailed design and construction is at least two to three years in the future.

Please feel free to contact Darryl Gregg or me if you have any questions or comments.

Sincerely,

*Michial M. Emery*
