

CONSTRUCTION PLANS FOR PACIFIC AVENUE STORM DRAIN

**PUBLIC WORKS DEPARTMENT
CITY OF ALBUQUERQUE**

GENERAL NOTES

1. All work detailed on these plans to be performed under contract shall, except as otherwise stated or provided for hereon, be constructed in accordance with the City of Albuquerque Standard Specifications for Public Works Construction 1986 Edition as amended with Update No. 6.
2. Prior to construction, the Contractor shall excavate & verify the horizontal and vertical locations of all obstructions. Should a conflict exist, the Contractor shall notify the Engineer so that the conflict can be resolved with minimum delay.
3. Two (2) working days prior to any excavation, Contractor must contact Line Locating Service @ 260-1990 for location of existing utilities.
4. Contractor shall support all existing, underground utility lines which become exposed during construction. Payment for supporting work shall be incidental to storm drain line pay item costs.
5. All street centerlines shown on the plans are the centerlines of existing streets as determined by splitting the distance between existing curbs.
6. Contractor shall conduct his operations in a manner which will minimize interference with local traffic. Contractor shall comply with all applicable laws, ordinances, rules, regulations, and orders of any public body having jurisdiction for the safety of persons or property, and to protect them from damage, injury, or loss. Contractor shall erect and maintain, as required by the conditions and progress of the work, all necessary safeguards for safety continuously and not limited to normal working hours, throughout the duration of the project. Contractor shall adhere to Section 19 of the General Conditions of the City of Albuquerque Standard Specifications for Public Works Construction, 1986, as amended with Update No. 6.
7. The Contractor agrees that he shall assume the sole and complete responsibility for the job site conditions during the course of construction of this project, including safety of all persons and property; that this requirement shall apply continuously and not be limited to normal working hours; and that the Contractor shall defend, indemnify, and hold harmless the Owner & Engineer from any and all liability real or alleged, in connection with the performance of work on this project, excepting liability arising from the sole negligence of the Owner or Engineer.
8. **TRAFFIC CONTROL:** Five (5) working days prior to beginning construction the Contractor shall submit to the Construction Coordination Division a detailed construction schedule. Two (2) working days prior to construction, the Contractor shall obtain a barricading permit from the Construction Coordination Division. Contractor shall notify Barricade Engineer (768-2551) prior to occupying an intersection. See Section 19 of the specifications.
9. The Contractor shall promptly clean up any material excavated within the public right-of-way so that the excavated material is not susceptible to being washed down the street or into any public drainage facility.
10. Contractor shall assist the Engineer/Inspector in the recording of data on all utility lines and accessories as required by the City of Albuquerque for the preparation of record drawings. Contractor shall not cover utility lines and accessories until all data has been recorded.
11. Existing curb and gutter, sidewalks and driveways not to be removed under the contract which are damaged or displaced by the Contractor, shall be removed and replaced by the Contractor at his expense.
12. All work on this project shall be performed in accordance with applicable federal, state, and local laws, rules, and regulations concerning construction safety and health.
13. All fittings on waterlines shall have restrained joints.
14. The Contractor is responsible for protecting and maintaining all existing monumentation controls. In the event of inadvertent destruction or alteration, the Contractor must immediately notify the City Chief Surveyor.
15. PNM will provide at no cost to the City or the Contractor the required personnel for inspection or observation deemed necessary by PNM while the Contractor is exposing PNM's cables. However, the Contractor shall be charged the total cost associated with repairs to any damaged cables or for any cost associated with supporting or relocating the poles and cables during construction.

16. **WARNING--EXISTING UTILITY LINE LOCATIONS** are shown in an approximate manner only, and such lines may exist where none are shown. The location of any such existing lines is based upon information provided by the utility company, the Owner, or by others, and the information may be incomplete or may be obsolete by the time construction commences.

The Engineer has undertaken no field verification of the location, depth, size, or type of existing underground utility lines, makes no representation pertaining thereto, and assumes no responsibility or liability therefor. The Contractor shall inform itself of the location of any utility line in or near the area of the work in advance of and during excavation work. The Contractor is fully responsible for any and all damage caused by its failure to locate, identify, and preserve any and all existing utilities. The Contractor shall comply with State statutes, municipal and local ordinances, rules and regulations pertaining to the location of these lines and facilities, in planning and conducting excavation, whether by calling or notifying the utilities, complying with "Blue Stakes" procedures, or otherwise.
17. All street striping altered or destroyed shall be replaced by the Contractor to existing patterns. Replacement shall be with plastic reflectorized pavement markings. Any such striping shall be considered incidental to pavement construction and no separate payment shall be made therefor.
18. Graded access for residents across the construction zone shall be maintained during construction. On residential streets, one lane of traffic must be maintained at all times.
19. The Contractor shall be responsible for notifying utilities for any adjustment or relocation of existing utilities required by construction. The Contractor may be required to reschedule his activities to allow utility crews to perform their work. No additional costs will be allowed for delays or inconvenience caused by utility company crews.
20. Lowering of the existing gas line on Cromwell is required in advance of construction. The Contractor shall remove all pavement necessary for lowering the line. Contractor shall schedule his work to allow the Gas Company to lower the line prior to storm drain construction.
21. The Contractor shall confine his work within the street right-of-way. Overnight parking of the Contractor's equipment shall not obstruct access roads or traffic lanes.
22. The removal and replacement of all signs, posts, fences, mail boxes and road markings shall be considered incidental to storm drain line construction.
23. All pipe bedding shall conform to Class C bedding as defined in Section 701 of the specifications.
24. There shall be a minimum clearance between utility lines of 0.5 feet. Where this is not possible, two layers of 1/2" expansion joint material shall be placed between utility lines. The cost of providing and placing expansion joint material shall be considered incidental to storm drain line construction and no separate payment shall be made therefor.
25. All storm drain line pipe shall be reinforced concrete pipe, Class III.
26. Curb returns removed shall be replaced with curb returns with Handicap Ramps.
27. Full street closure shall be limited to a maximum of 150 LF at a time.
28. All excavation, trenching and shoring must be accomplished in accordance with OSHA 29CFR 1926.650 Subpart P.

12	WALTER STREET, WATER LINE PLAN & PROFILE

29. Water shut-off plans are for City use only. Water distribution system shut-off and turn-ons shall be as per Section 18.3 of the General Conditions. The Contractor is responsible for coordination of the water shut off plans with Water Systems Division ~~three~~ working days in advance of shutoff by Water Systems Division (Telephone 857-8200)
30. All waterline replacement connections shall be per City of Albuquerque Standard Drawing 2301.
31. All concrete blocking shall be per City of Albuquerque Standard Drawing 2320.
32. Valve box Type "A" shall be per City of Albuquerque Standard Drawing 2325.
33. Install new fire hydrants as per City of Albuquerque Standard Drawing 2340.
34. Contractor shall exercise caution when removing or working around existing steel lines to avoid electrical shock. Electrical bonds or jumpers are recommended to be used prior to separating steel lines.
35. Water service lines and meters shall be replaced, transferred, relocated, and rehabilitated as per Section 802 of the technical specification and the plans.
36. Provide 4 1/2 feet of bury on all fire hydrants.
37. Where new waterline is installed without a new valve between it and existing line, the Contractor may be required to fill, test, and flush the new line prior to connecting to the existing line, using an independent water source.
38. All new water service lines 2" and smaller shall be copper, ASTM B88, Type K.
39. The Contractor shall not decrease a water service line size unless directed by the Engineer. If differing service line sizes are found other than shown on the tables, notify the Engineer for resolution.
40. Contractor to work 7:00 a.m. to 7:00 p.m., Monday through Friday.
41. Contractor to notify residents 48 hours in advance of any road closures.
42. Open excavations shall be tightly barricaded at the completion of each day and all open excavations shall be backfilled over weekends.
43. All roadways shall be opened to traffic at the end of each day.
44. Contractor shall maintain a graffiti-free work site. All graffiti shall be removed promptly from all equipment, permanently or temporarily.
45. All work involving a lane closure on Broadway Boulevard shall be worked continuously, 24 hours per day, until completed or until all barricades have been removed from Broadway Boulevard.
