ENGINEER'S STAMP DATED 5/26/95.

Dear Mr. Gomez:

Based on the information provided on your May 30, 1995 submittal, listed you will find certain concerns that will need to be addressed prior to final approval:

1. Top of curb elevations to mean sea level on second street.
2. Hydraulics for the proposed sidewalk culvert compute the entrance capacity.
3. Basin 3 shows an increase in volume, retention ponds are not allowed by ordinance. They must be drained within 24 hours.

RE: DRAINAGE PLAN FOR MRGCD ALBUQUERQUE DIVISION YARD (L14
- D40) ENGINEER'S STAMP DATED 5-26-95

Dear Mr. Montoya:

We are writing to you in response to your comments dated June 13, 1995 regarding the above referenced grading and drainage plan.

1. We have revised the grading and drainage plan to show top of curb elevations within the Second Street Right-of-Way to reflect mean sea level elevations.
2. Hydraulic calculations for the proposed sidewalk culvert are attached. The sidewalk culvert was analyzed using the orifice equation. The computed capacity under submerged conditions is 2.30 c.f.s..
3. Per your conversation with Mr. Leonard Utter, we have prepared an agreement which holds harmless the City for the construction of a retention pond within Basin 3 as shown in the grading and drainage plan. The retention pond is necessary to drain the east side of the Albuquerque Division Yard. Drainage of Basin 3 to Second Street is not possible because the Basin 3 is lower than the top of curb at Second Street.

We believe this addresses your comments and request building permit approval.

Should you have any questions or require any additional information please feel free to contact our office at 247-0234.
