

David,

I checked with Tim, and the 6-18-2013 Grading Plan is what was included in the approved Building Permit sets.

If the only change on the resubmittal is for the Mech Room slab grades, then the best thing to do would be to just red-line them onto the Certification Plan as-built.

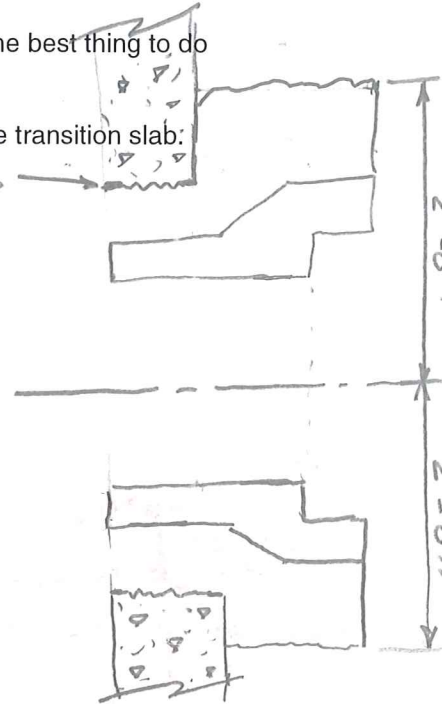

FYI, I found our file, and am attaching a copy of the portion with the note for the transition slab:

Thanks,

Greg Olson, PE
