FEMA PANEL NO. 350002 0035

HERTZ RENTAL CAR FACILITIES
DRAINAGE AND GRADING PLAN

LEGAL DESCRIPTION: Por. Tract G Municipal Addition #9
ZONE ATLAS PAGE NO. M-16

This site is located within the Albuquerque International Airport just east of the existing parking facilities. The project area is included within the Master Drainage Plan for the Albuquerque International Airport. The proposed improvements conform to the Master Plan. Improvements consist of a 1530 square foot building, repaving the parking lot, the existing building will remain.

Currently, the site is totally impervious. The proposed improvements will cause runoff to drain to the northeast corner of the lot as itcurrently does. Runoff rates and volumes have been determined by the Rational Formula as shown in the City of Albuquerque Development Process Manual.

EXISTING CONDITIONS

Tine of Concentration - 2 minutes; use 10 minutes.

6-Year Rainfall Volume - 100 yr. 2.31
10 yr. 1.52

Intensity: 100 yr. 5.01 in/hr
10 yr. 3.30 in/hr

"C" Value - 0.95

Area = 70,013.5 sq. ft. or 1.61 acres

Runoff rates Q 100 yr. = 7.7 cfs
Q 10 yr. = 5.0 cfs

PROPOSED CONDITIONS

Same as above - No changes in "C" value, intensity or area

Construction of the proposed improvements will not change the amount of flow, the rate of flow or the outfall location. Therefore, we recommend approval of this Drainage and Grading Plan pursuant to a building permit.

HERTZ RENTAL CAR FACILITIES
DRAINAGE AND GRADING PLAN

LEGAL DESCRIPTION: Por. Tract G Municipal Addition #9
ZONE ATLAS PAGE NO.: M-16

This site is located within the Albuquerque International Airport just east of the existing parking facilities. The project area is in the SW quadrant of the Airport. The proposed improvements conform to the Master Plan. The improvements consists of a 1520 square foot building, repaving the parking lot, the existing building will remain.

Currently, the site is totally impervious. The proposed improvements will cause runoff to drain to the northeast corner of the site. (currently does). Runoff rates and volumes have been determined by the Rational Formula as shown in the City of Albuquerque Development Process Manual.

EXISTING CONDITIONS

Basin Data
Time of Concentration = 2 minutes. Use 10 minutes

6-Hour Rainfall Volume - 100 yr. 2.13
10 yr. 1.52

Intensity - 100 yr. 5.01 in/hr
10 yr. 3.58 in/hr

"C" Value - 0.95

Area = 70,013.5 sq. ft. or 1.61 acres

Runoff Rates @ 100 yr. = 7.7 cfs
@ 10 yr. = 5.5 cfs

PROPOSED CONDITIONS

Same as above. No changes in "C" value, intensity or area

Construction of the proposed improvements will not change the amount or flow rate of the flow of water at the outfall location. Therefore, we recommend approval of this Drainage and Grading Plan pursuant to a building permit.
