**RE: Terminal Roads and Expansion of Passenger Facilities
City of Albuquerque Job Number A/E 5922-01
Phase III, Task One, University Boulevard and Consolidated Rental Car Facility**

SUBJECT: Termination of Construction Management Services

Dear Mr. Aguirre:

Please be aware that effective May 13, 2000, URS will no longer provide Construction Management Services, on behalf of the City of Albuquerque, for the above referenced project.

From May 14, 2000, BPLW will take full responsibility for Construction Administration Services for the project. The BPLW team will continue to work out of the existing Project Site Office located at 3201 University Blvd SE Suite 210, Albuquerque, NM 87106.

BPLW's senior representative will be Mr. Dave Ellin. You may address any questions regarding the project and this matter to Mr. Ellin at the Site Office or the Sunport's Director of Planning Development, Mr. Dennis Parker.

Sincerely,

URS Greiner Woodward Clyde, Inc.

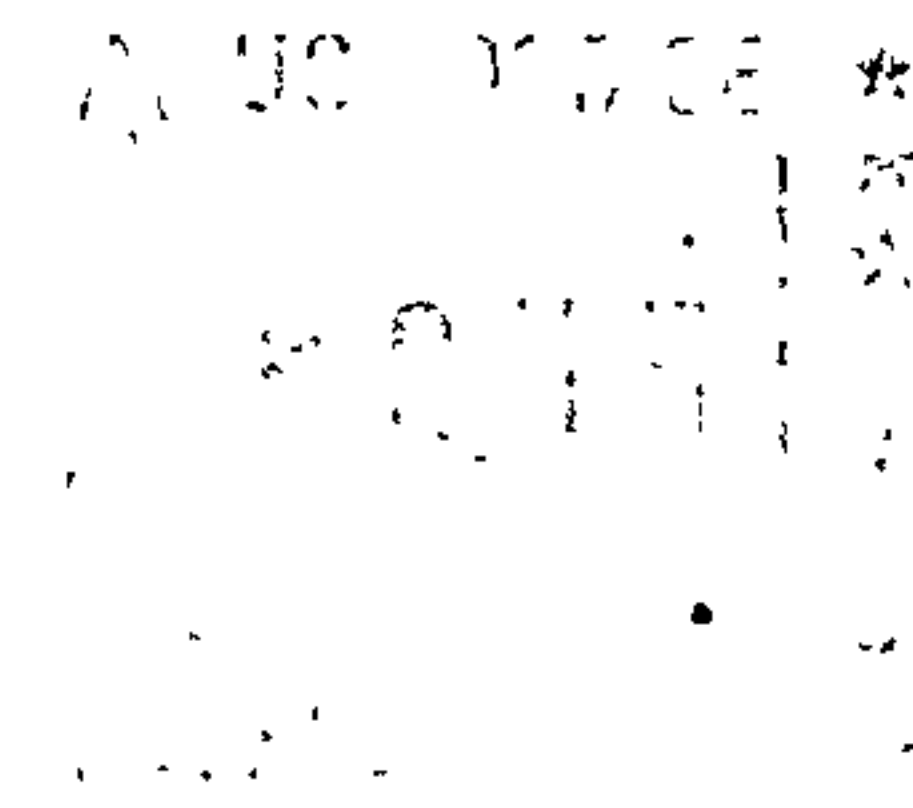

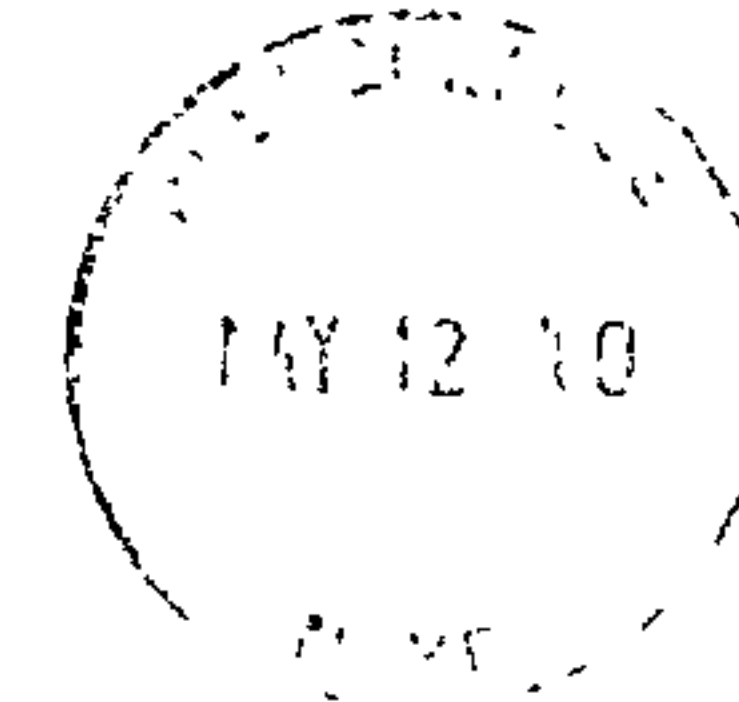

Otto S. Randolph
Director of Construction Services

**RE: OLD ALBUQUERQUE AIRPORT TERMINAL, 5001 Yale Blvd SE (M16-D34).
Updated GRADING PLAN FOR BUILDING PERMIT APPROVAL. ENGINEER'S
STAMP DATED April 23, 2001. Previously stamped December 14, 2000.**

Dear Mr. McGee:

Based on the information provided on your April 24, 2001 submittal, the above referenced project is approved for Building Permit.

Please attach a copy of this approved plan to the construction sets prior to sign-off by Hydrology.

Prior to Certificate of Occupancy approval, an Engineer's Certification per the DPM will be required.

If I can be of further assistance, please feel free to contact me at 924-3984.

Sincerely,

John P. Murray, P.E.

RE: OLD ALBUQUERQUE AIRPORT (M16-D34). GRADING PLAN FOR ROUGH GRADING PERMIT APPROVAL. ENGINEER'S STAMP DATED 5-15-98.

Dear Mr. McGee:

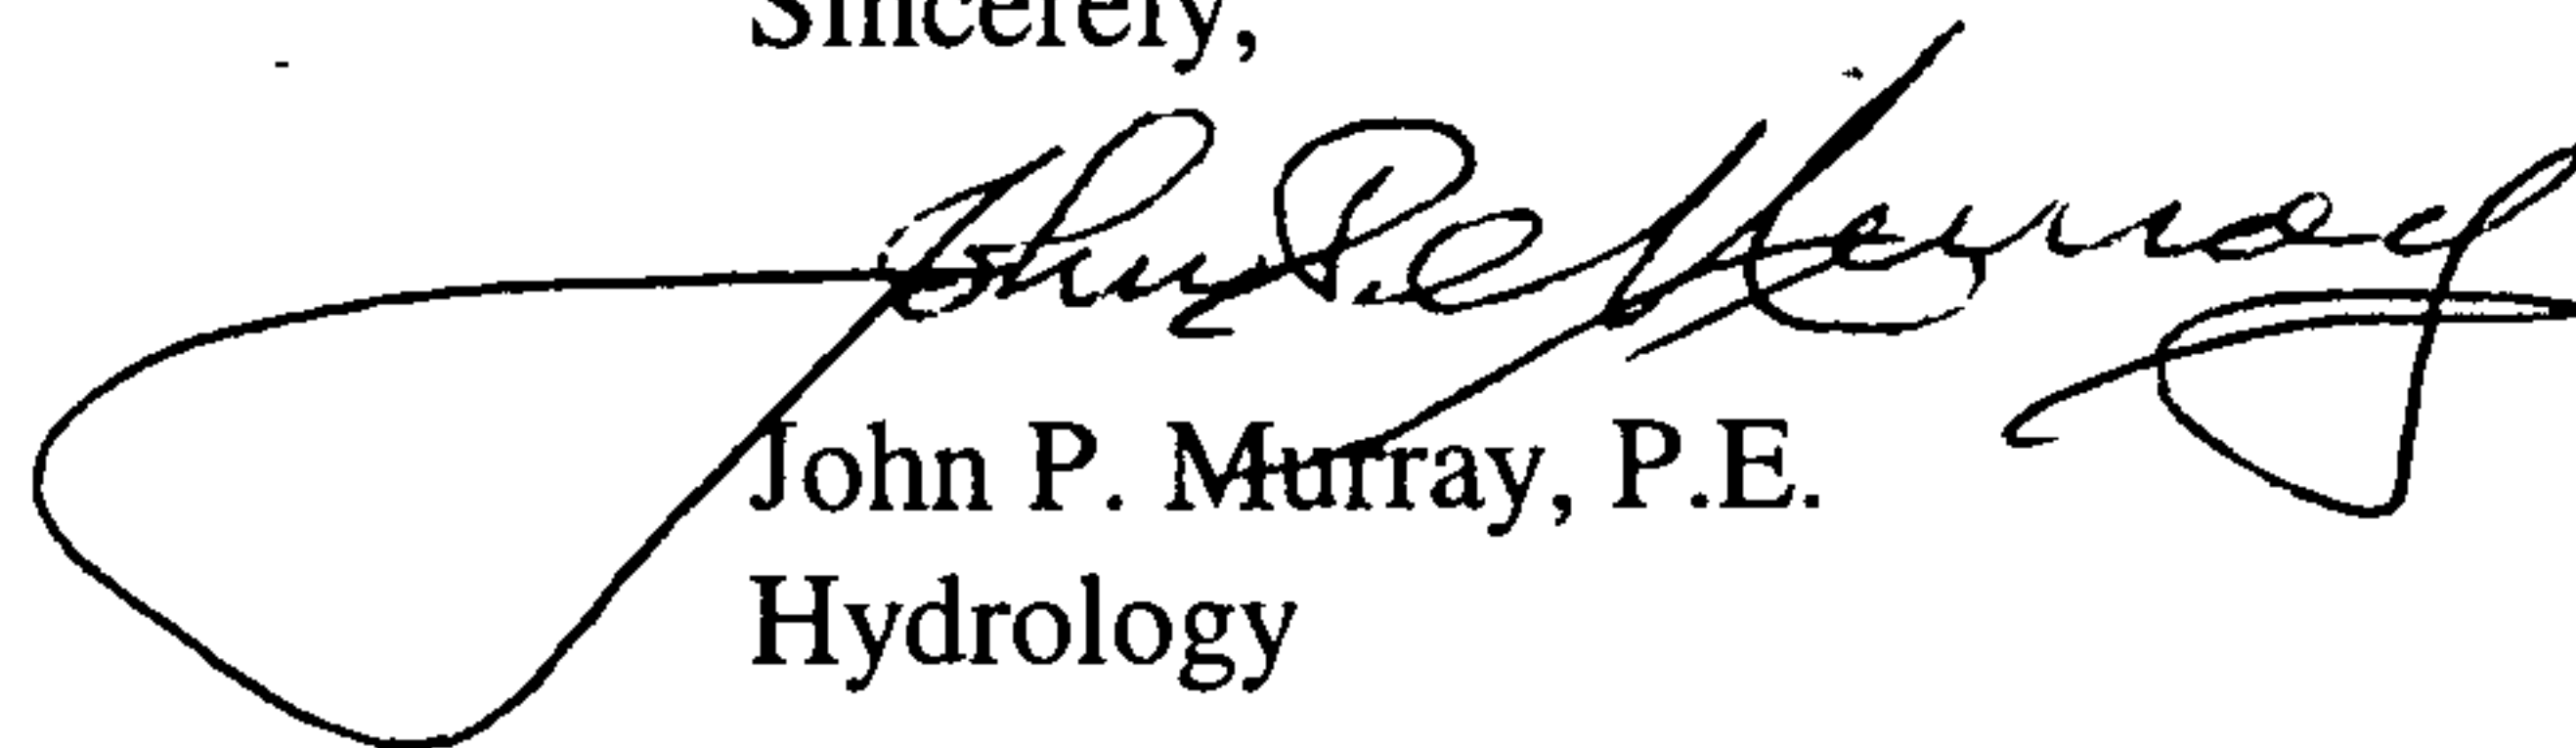

Based on the information provided on your May 15, 1998 submittal, the above referenced project is approved for Rough Grading Permit.

Dry wells, i.e., French drains, because of potential maintenance concerns, e.g., adverse affects on foundations, generally are prohibited. Justification for their use - suitability of soils/volume of water - needed.

An Engineer's Certification will be required upon project completion.

If I can be of further assistance, please feel free to contact me at 924-3984.

Sincerely,

John P. Murray, P.E.

Attn: D. James See

RE: **Subsurface Soil At Dry Wells
Old Terminal Building
Albuquerque International Sunport
Albuquerque, New Mexico**

Dear Mr. See:

As per our previous conversation, I am writing this letter in reference to the subsurface soil conditions in the area of the old terminal building. Geo-Test, Inc. has performed geotechnical engineering services on projects adjacent to the old terminal building site. These projects include the site development for the US Post office to the west and the construction of Sunport Boulevard to the north.

Both of these projects included excavation to a depth of approximately 30 feet near the reference project site. The soils encountered in these excavations were all free draining soils consisting of fine to coarse grained sands. Each of the projects are approximately 200 feet from the proposed dry wells and each project consisted of very large excavations. The soils encountered were relatively consistent in grading and in strata formation.

The hydraulic conductivity of the adjacent soils should be considered moderate to high and would allow for generally fast dissipation of moisture collected in a dry well.

If you have any questions or need additional information, please contact our office.

Respectfully:

GEO-TEST, INC.
