#	PAGE	SECTION	COMMENT	AGENCY	STATUS	RESPONSE
1	4	Study Area, Land Use and Streets	Page 4, right before the last sentence under the description of University, Page there is a single word sentence of Crick. This looks like an editing mistake	CABQ	Agree	Addressed
2	6	Project Description	Page 6, 4th to the last part of the last sentence under the description of University and Fritts is confusing. Please review.	CABQ	Agree	Addressed
3	25	Capacity Analysis	For University and Crick WBL did you consider if drivers may start rerouting to University and Fritts? I suspect this may happen especially in the horizon year (2036) with an expected delay of 2227.5 sec.	CABQ	Evaluate	<p>No, we did not perform that level of detailed analysis. The horizon scenarios are intended as a simplified forecast of potential future conditions. As commented, in the absence of a traffic signal or other capacity improvements, some trips would likely re-route to alternative roadways.</p> <p>The horizon year mitigated scenario demonstrates that a future traffic signal would address the identified capacity issues. However, a signal is not recommended at this time, as traffic volumes likely do not meet the applicable signal warrants.</p> <p>As noted in the recommendations, it is advised that this intersection be monitored as surrounding developments within Mesa Del Sol are constructed to reassess conditions and determine when further improvements may be warranted.</p>
4	25	Capacity Analysis	Page 25 University and Crick, Table 9 shows intersection LOS F in AM and LOS C in PM, but the description below calls out LOS D in AM and LOS C in PM. Please clarify which is correct.	CABQ	Agree	Addressed
5	25	Capacity Analysis	Page 25 University and Fritts, Table 9 shows intersection LOS B in AM and LOS C in PM, but the description on page 26 calls out LOS C in AM and LOS C in PM. Please clarify which is correct.	CABQ	Agree	Addressed
6	25	Capacity Analysis	Page 25 Crick and Watson, Table 9 shows intersection LOS B in AM and LOS B in PM, but the description on page 26 calls out LOS C in AM and LOS B in PM. Please clarify which is correct.	CABQ	Agree	Addressed
7	30	Crash Summary	Page 30, driver inattention was listed twice as a contributing factor.	CABQ	Agree	Addressed
